

Sauvie Island Important Bird Area

The Important Bird Area (IBA) Program is an international program that identifies outstanding lands for birds. It attempts to build an interconnected landscape of sites that have outstanding value for breeding or migratory birds. Wapato is part of the 12,000-acre Sauvie Island IBA, which is just one of over 9,000 IBAs worldwide!

WAPATO ACCESS AREA 2010

79 species have been recorded at this site!

American Coot (Stn. 2)	Lesser Goldfinch
American Crow	Mallard (Stn. 2)
American Goldfinch Mourning Dove	
American Robin	Northern Harrier (Stn. 2)
Anna's Hummingbird	Pacific Slope Flycatcher
Bald Eagle (Stn. 2)	Pied-billed Grebe (Stn. 2)
Barn Swallow	Purple Finch
Belted Kingfisher (Stn. 2)	Red-breasted Nuthatch
Bewick's Wren	Red-breasted Sapsucker
Black-capped Chickadee	Red-eyed Vireo
Black-headed Grosbeak	Red-shafted Flicker
Black-throated Gray Warbler	Red-tailed Hawk
Brown Creeper	Red-winged Blackbird (Stn. 2)
Brown-headed Cowbird	Rufous hummingbird
Bullock's Oriole	Scrub Jay
Bushtit	Song Sparrow
California Quail	Sora (Stn. 2)
Cassin's Vireo	Spotted Towhee
Cedar Waxwing	Stellar's Jay
Cinnamon Teal (Stn. 2)	Swainson's Thrush
Common Yellowthroat (2)	Tree Swallow
Cooper's Hawk	Turkey Vulture
Dark-eyed Junco	Vaux's Swift
Downy Woodpecker Violet-green Swallow	
Eurasian Collared Dove *	Virginia Rail (Stn. 2)
European Starling *	Warbling Vireo
Gadwall (Stn. 2)	Western Tanager
Golden-crowned Kinglet	Western Wood-pewee
Golden-crowned Sparrow	White-breasted Nuthatch
Great Blue Heron (Stn. 2)	White-crowned Sparrow
Great Horned Owl	Willow Flycatcher
Hooded Merganser (Stn. 2)	Wilson's Warbler (Stn. 2)
House Wren	Wood Duck (Stn. 2)
Hutton's Vireo	Yellow Warbler (Stn. 2)
Killdeer	* non-natives
<i>+recent waterfowl sightings (Stn. 2):</i>	
American Wigeon	Lesser Scaup
Bufflehead	Northern Pintail
Common Merganser	Northern Shoveler
Gadwall	Ring-necked Duck
Green-winged Teal

How Can I Help on Sauvie Island?

- Weed removal at Wapato State Access Area
- Great Blue Heron Rookery Monitoring
- Sauvie Island Kestrel Nest Box Surveys
- Wapato Access Area Point Count Monitoring
- eBird Reporting

To help monitor for birds on Sauvie Island or elsewhere, contact Mary Coolidge at 503.292.6855 x111

Citizen Science at Wapato

The observations of citizens can play an invaluable role in helping us understand and manage our local wildlife populations. Citizen Science is a great way to have fun, learn about the natural world, and make a difference for wildlife. **The Portland area hosts 209 bird species which spend part or all of their lives in the Portland area!**

Birds are excellent indicators of environmental health and can be monitored as a reflection of changes in habitat or restoration effectiveness. Oregon State Parks and West Multnomah Soil & Water Conservation District are working together on habitat restoration at Wapato. Audubon Citizen Scientists are already monitoring birds here to collect baseline data and to help gauge the effectiveness of habitat restoration.

What is a Point Count?

A point count is a standard method for inventorying birds at a particular site. A path is drawn through an area, with multiple stations designated along the route. Monitors visit each station for a total of 6 minutes and record every bird they detect by either sight or sound!

There are 8 stations located along the 2.25-mile path at Wapato. Each one is associated with an area where there is potential for invasive plant species removal and native plant restoration.

Stations are numbered on the map to the right.

1. Open-land / mixed-deciduous forest, with English hawthorne invasion; potential White oak woodland site
2. Viewing platform at Virginia Lakes; extensive Reed canarygrass invasion, potential for native wetland plant community, including wapato
3. Native dogwood, elderberry, willow; invasive blackberry and Reed canarygrass
4. Alder & cottonwood forest, snowberry, dogwood; invasive blackberry and Reed canarygrass
5. Alder and cottonwood forest; invasive Reed canarygrass
6. Wetland edge; encroaching Himalayan blackberry and Reed canarygrass
7. Oregon White oak savannah; invasive Himalayan blackberry and Douglas fir encroachment
8. Oregon White oak and Douglas fir; extensive Himalayan blackberry invasion
